quick start guide
first configuration of BleBox controllers

wBox APP | wBox APP | wBox APP

Table of contents

1 How to use **wBox** app — p. 2

1.1 Account
2.1 Tutorial of the wBox application

2 How to configure a new **BleBox** device — p. 3

2.1 Connect the phone with the BleBox controller
2.2 Configure a new BleBox device
2.3 Turn off or set password to BleBox AP

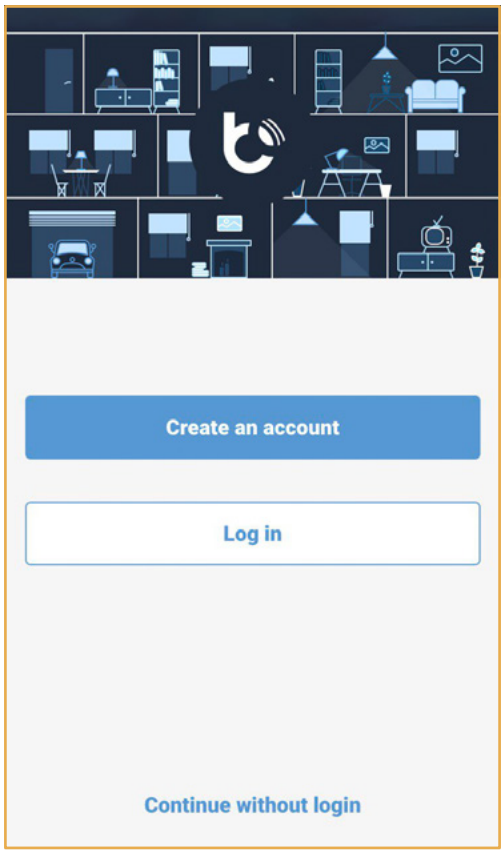
3 How to add configured **BleBox** device to another account — p. 7

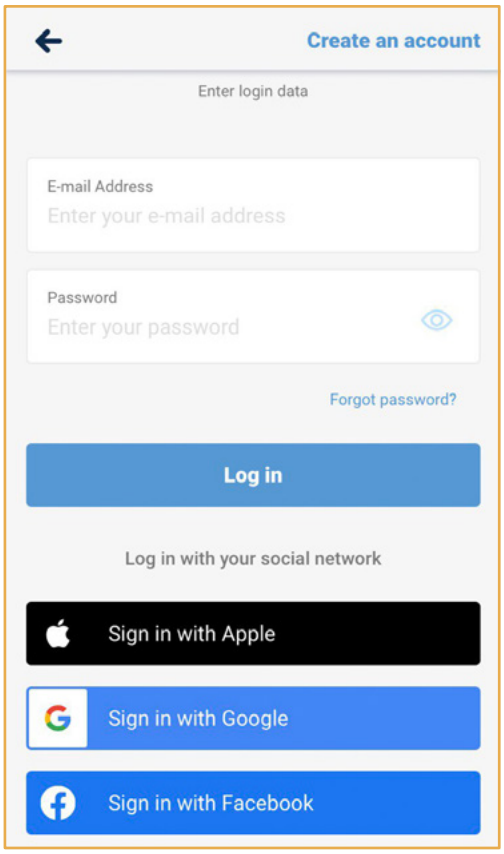
3.1 Search for BleBox controllers connected to the WiFi network
3.2 Sharing controllers via e-mail

1.1

At the launch of wBox app, it will ask you to log in or create an account.

You can create the **BleBox** account or log in using your **Google, Apple** or **Facebook** account.

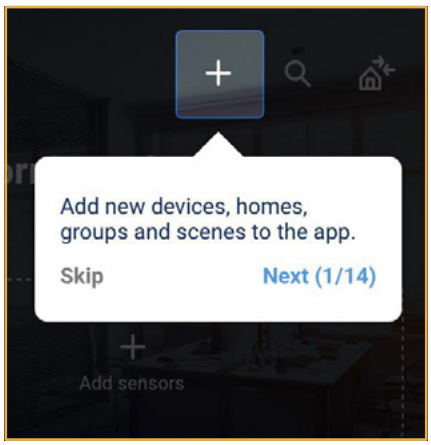




You can continue without login (dedicated for installers for one-time connection of the controller), but the features of the app will be limited.

We strongly recommend to create an account or log in.

1.2



After logging in, the **wBox** tutorial will automatically appear.

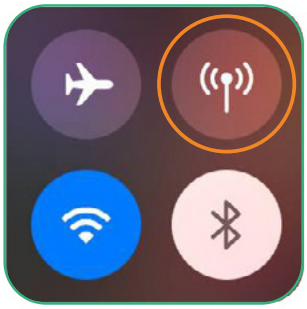
If you don't see the tutorial, click on the **„Menu"**,

and then on **„How to use".**

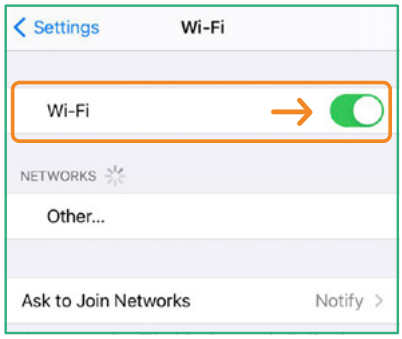
2.1 Connect the phone with the BleBox controller.

iOS version

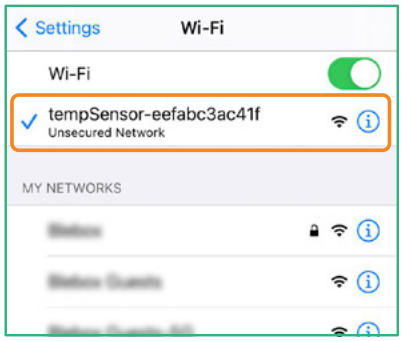
iOS



Please turn off mobile network/ cellular data in your phone.

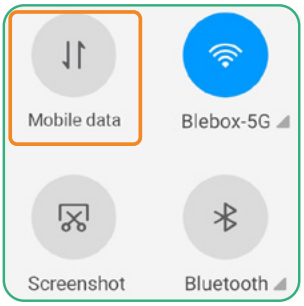


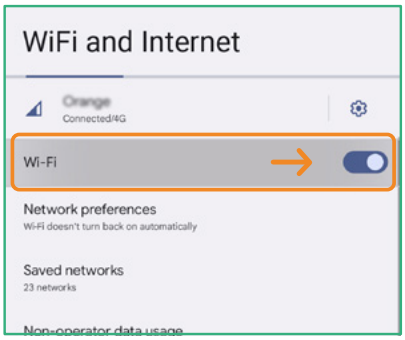
Please select WiFi settings in your phone and turn on WiFi network.



Connect to the WiFi network provided by the controller, for example: - *„device-xxxxxxxxxx”*, where xxxxxxxxxx is the unique number of the device.

Android version





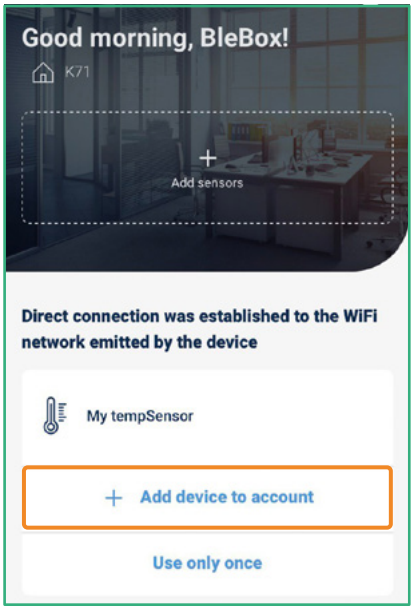
Connected!

Some phones may report that **“Internet may not be available”**- it‘s normal, please continue with this WiFi network.

After connecting to the WiFi network of the BleBox controller, return to the wBox application .

Version A

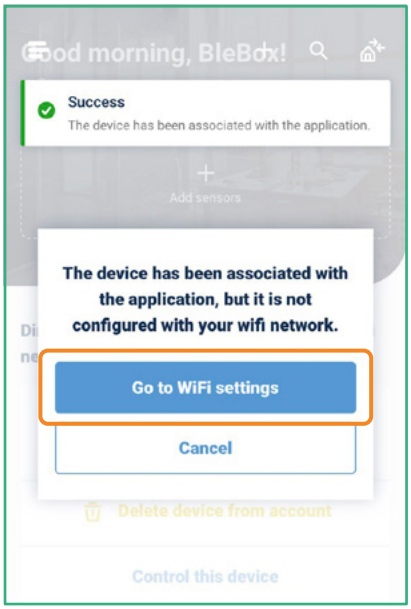
Please use **„+ Add device to account"** button to add the device to your account. **Now you became the owner of the device.** 1



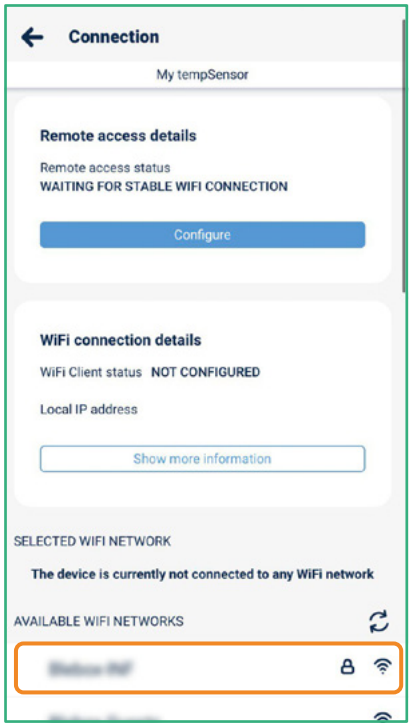
Ready!

You have added the device to your account. Then **„Go to WiFi settings".**

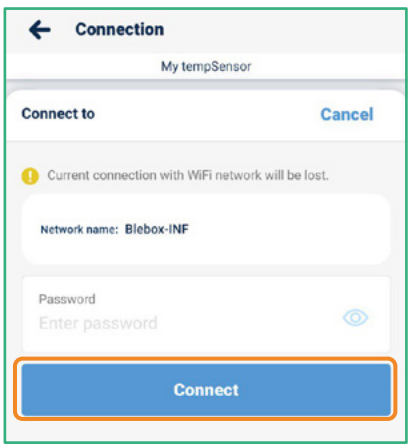
** If the message did not appear or you clicked „Cancel", please refer to version B (page 5).* 2



Select your home **WiFi** network from the list to connect the controller with this network. 3



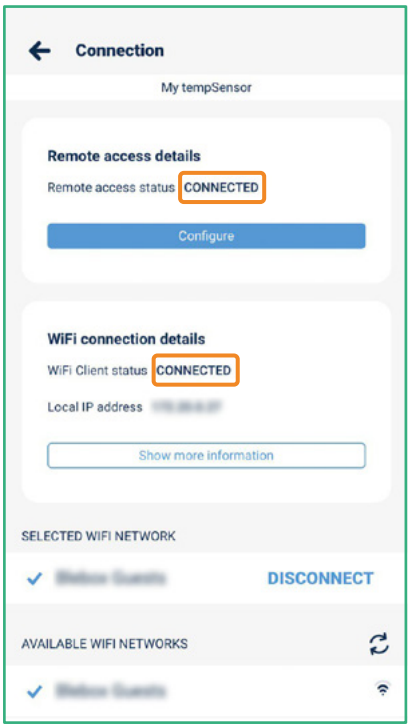
Enter your home WiFi password, then click **„Connect".** 4



WiFi Client status: connected!

The BleBox controller is connected to your home WiFi network.

Further part of the manual:
- page 6, p.2.3 5

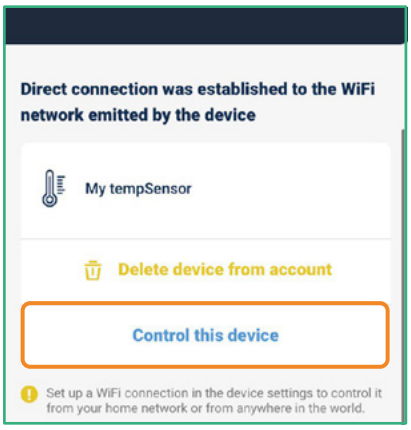


Remember!

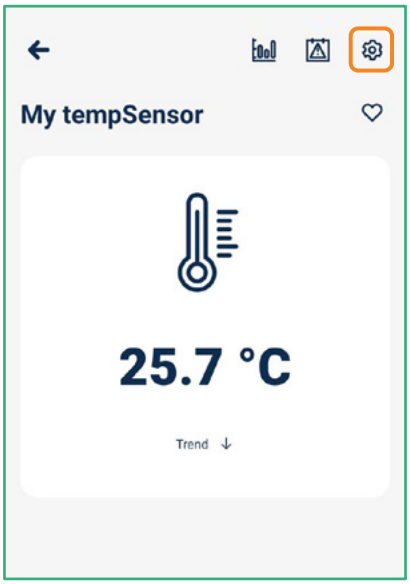
The owner of the device has the right to grant and revoke access to the device to other users.

Version B

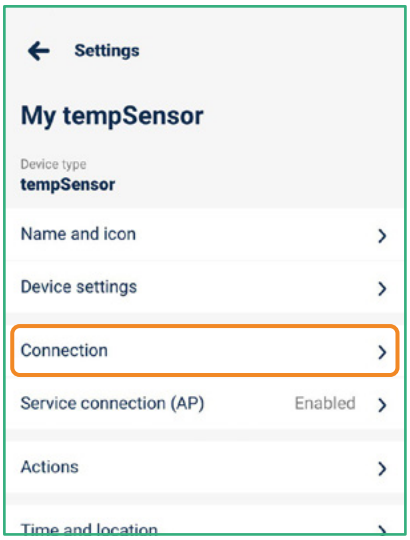
If you didn't see a message after adding the device to your account or you clicked **„Cancel"**, go to WiFi network settings. Select **„Control this device"**. 1



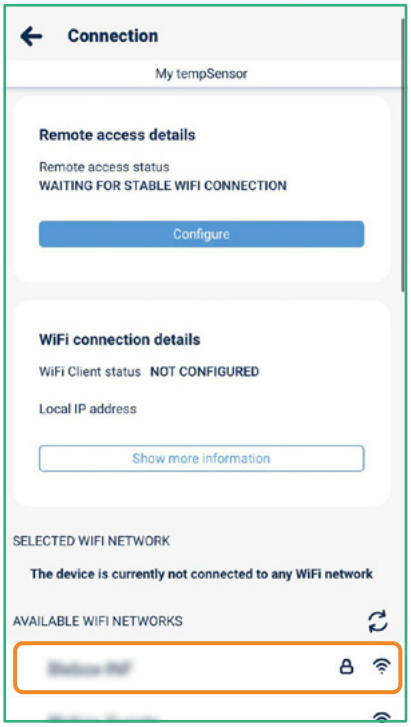
Find and click the settings icon ⚙. 2



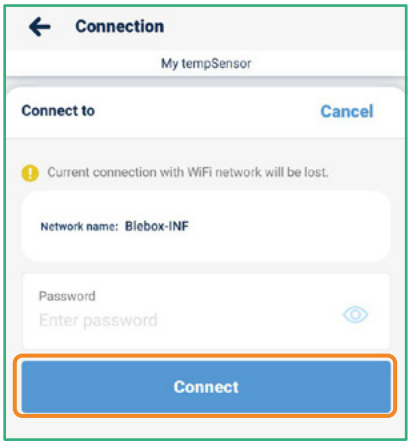
Click on **„Connection"**. 3



Select your home **WiFi** network from the list to connect the controller to this network. 4

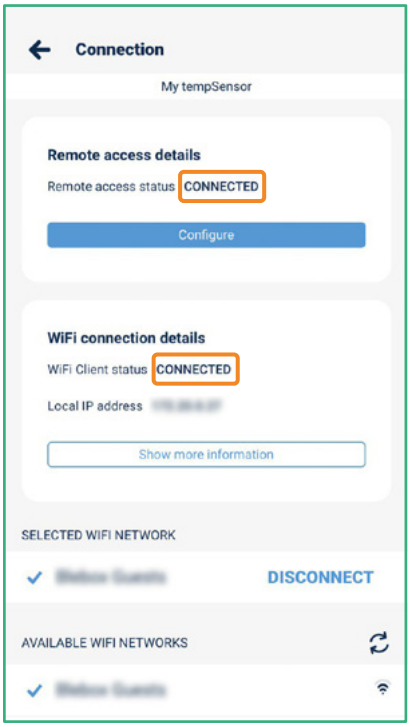


Enter your home WiFi password, then click **„Connect"**. 5



WiFi Client Status: Connected

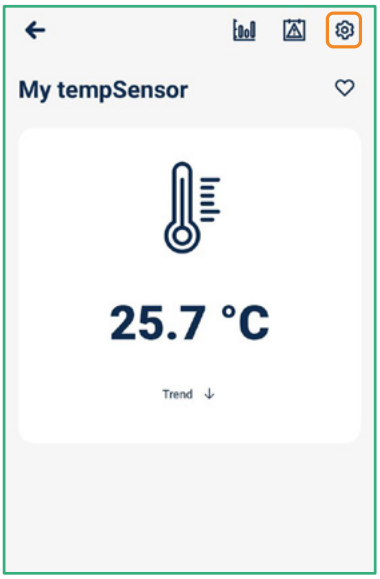
The BleBox controller has been connected to the home WiFi network. 6



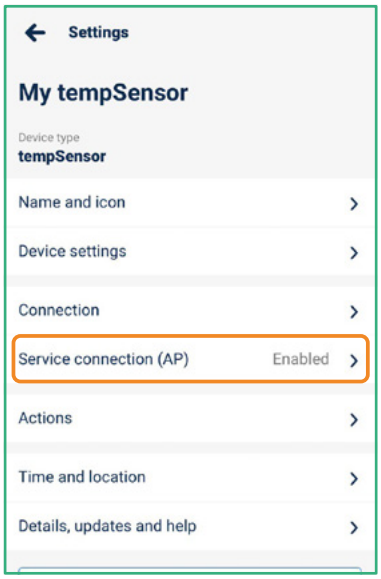
Remember!

The owner of the device has the right to grant and revoke access to the device to other users.

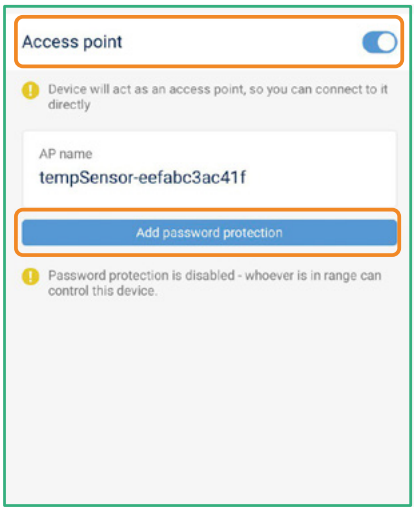
2.3 Disable or set a password for the service connection.



Click the settings icon ⚙.



Go to the **„Service Connection (AP)"** section.



Here you can **disable the access point** or set a password for the AP **to prevent unauthorized access**.

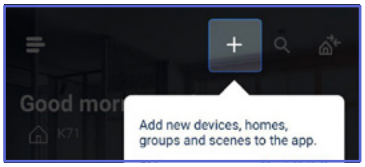
That's all!

For more information about your specific device, see the user guides.

Please continue below if you want to see how to share a configured device with another family member.

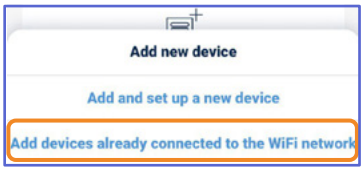
3.1 Add configured controller using another smartphone.

Find the „+" icon at the top of the screen. 1



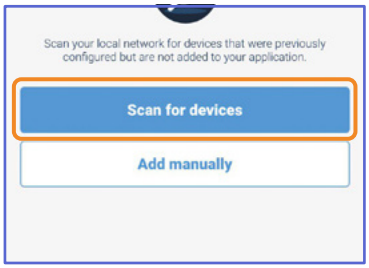
Click **„Add New Device".** 2

Select **„Add devices already connected to the WiFi network".** 3

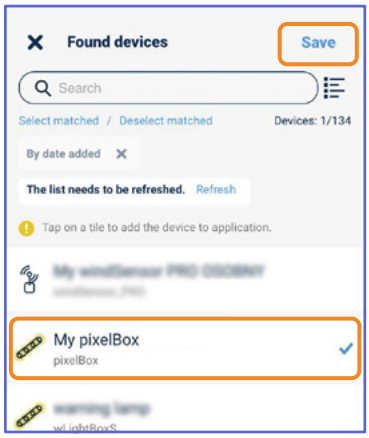


Select **„Scan for devices"** for devices and wait for the scan to complete.

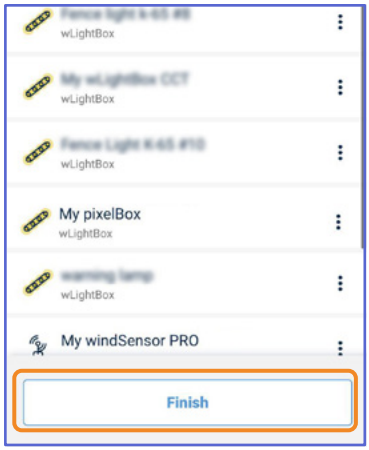
Remember that you must be connected to the same WiFi network as the BleBox controller. 4



Select the devices you want to add to your account and press **„Save".** 5



Click **„Finish",** the drivers will be added. 6

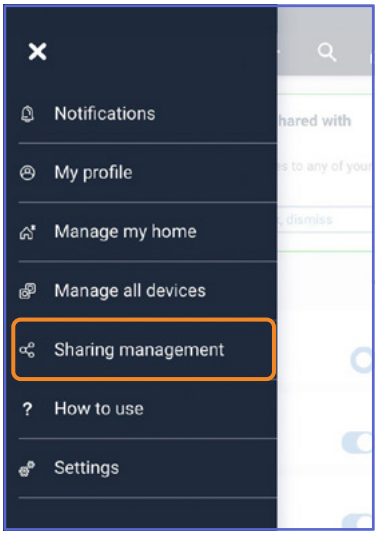


That's all!

You can go back to the dashboard or add controllers to specific home.

3.2 Sharing controllers via e-mail.

Use **“Sharing management”** option in wBox app menu ☰.



Use share option in µPortal **https://portal.blebox.eu.**
